

Make use of Open Educational Resources!
Take control of your own learning and development!

On the 23rd and 24th October, Eurospeak hosted the 4th Transnational meeting of the E-Coaching et apprentissage des langues (e-Cal Project) in Reading, UK.

The project partners from Danmar Computers were not able to attend in person, but Eurospeak welcomed partners from ASEV, Petra Patrimonia Corsica, Forium and Rietsch KG, to discuss the project piloting and the next steps of the project.

Danmar Computers joined the meeting by Skype to discuss feedback and issues with the online platform.

The meeting was focused on the results of the partners' initial piloting of the e-Cal project, and the feedback gathered from L2 Learners, and L2 Learning Supporters during the initial pilot.

The phase of piloting the outputs is currently still ongoing and feedback is still being gathered by partners. Any language learner or supporter willing to participate to the pilot can access the e-Cal platform through the following link:

<http://lms.ecalproject.eu/>

Stakeholder Committees are to be organised in each piloting partner's country, with the aim of helping to promote the project into the mainstream, to continue to make target groups aware of the project and to enhance potential dissemination and exploitation of the project.

The meeting also included a best practice, testimony and debate from the [BAME Community Leader in Reading, Boubacar Dembele](#). Mr. Dembele gained an understanding of the project by attending the initial stages, and having assessed the project's outputs from several points of view.
